

**Basic/Free:**

- Company name
- Company address
- Items
- Sector
- Company website/contact details
- Basic exporting function into Excel/PDF
- Related company news and trends tab to feature the Industry Research Team's thought leadership articles

**Plus:**

- Company ABN.
- Company summary.
- Capability types.
- Chat feature/communications function for engaging with ICN Victoria (connecting to the [research@icn.vic.gov.au](mailto:research@icn.vic.gov.au) address).
- Limited company information exporting function.
- Link to company project pages of Gateway by ICN.

**Premium:**

- Company revenue data.
- Company size measured in number of employees.
- Diversity markers i.e., Australian Disability enterprises, Social enterprises, Aboriginal owned business, Female owned business.
- General and/or industry-specific badges and certifications i.e., Australian-made certification, AFRDI certification for furniture items, ISOs, Australian Standards. Ideal that these can be easily changeable to suit client needs.
- Full company information export function.
- Local content percentages for items.
- Past projects tab or placeholder. If no past projects are applicable or known to share this ideally would not appear rather than appearing blank. (This applies to all empty fields)

**Notes:**

- Ideal to have modular, flexible features when selling the product that enables us to move the features around between free and premium tiers depending on the client, and the ability to turn off premium tiers.
- A saved companies/bookmarked feature can be available in the free/basic tier but only enable the creation of one folder that you cannot be filtered. Premium tiers can have multiple, named folders and the ability to filter them.
- It would be beneficial to create placeholders for all use cases.
